

JPE Replication Report

PUBLISHED
October 2, 2026

1 Paper Identification

ID	20240974
Author	Lawson
Title	The Minimum Wage in Firms' Organizations: Productivity Implications
Iteration	1

Some useful information up front:

- [JPE Data and Code Availability Policy](#)
- [Step by step guidance from Data Editor for Authors](#)
- [Template README](#)
-

2 Summary

In assessing compliance with our [Data and Code Availability Policy](#), our reproducibility team has identified the following issues, which we ask you to address:

1. You can have only one unique README document as already discussed via email. This needs to sit at the root of your package (not in a subdirectory as current), and it needs to contain *all* required documentation for the *entire* package.
2. There are several discrepancies in your output. This concerns some figures and some tables. Please check.

3 General

- ☒ Data Availability and Provenance Statements
 - ☒ Statement about Rights - Part 1: Right to use the data (e.g. *did the authors lawfully obtain the data*)
 - ☐ Statement about Rights - Part 2: Right to publish the data (e.g. *are human subjects involved and did permission been granted to publish their data?*)
 - ☐ License for Data (optional, but recommended)
 - ☐ Details on each Data Source
- ☒ Dataset list
- ☒ Computational requirements
 - ☒ Software Requirements
 - ☐ Controlled Randomness (as necessary)
 - ☒ Memory, Runtime, and Storage Requirements
- ☒ Description of programs/code
 - ☒ License for Code (Optional, but recommended)
- ☐ {REPLICATOR} to Replicators
 - ☒ Details (as necessary)
- ☒ List of tables and programs
- ☒ References (Optional, but recommended)

Note that the authors provide 2 distinct ReadMe's. Not sure whether it would be more suitable to combine them into one.

4 High-level Description of Research Project

This research project...

- ☐ uses observational data.
- ☒ uses *confidential* observational data.
- ☐ uses data generated via experiment or trial by the authors (in field or lab).
 - ☐ For lab experiments: The code to implement the experimental protocol (z-Tree, o-Tree etc) is included in the package.
 - ☐ A PDF copy of IRB approval is contained in the package.
 - ☐ A PDF document outlining the design of the experiment, including information on the selection and eligibility of participants is included.
 - ☐ A PDF copy of the instructions given to participants in both original language and an English translation is included.
- ☐ uses data generated via survey by the authors (in field or online)

- ☐ The programs used to administer the survey (e.g. qualtrics survey file) are included.
- ☐ A PDF copy of IRB approval is contained in the package.
- ☐ A PDF of the original questionnaire(s) and information on the selection and eligibility of participants is included.
- ☒ is a simulation study: the data are generated by an algorithm.
- ☐ is a numerical illustration: no data are used but code is used to produce illustrative output (tables, figures)

5 Data description

For any data that cannot be provided as part of the replication package, please provide the following information as part of the README.

{REQUIRED} Please specify how long the data will be preserved in the restricted-access location.

{REQUIRED} Please provide affirmation of support for replication checks. – As per the [JPE policy](#), “In cases where data cannot be published in an openly accessible trusted data repository like the JPE dataverse, authors who have requested an exemption to publish them at the time of first submission must commit to preserving the data and code for a period of no less than five years following the publication of the paper. They should also provide reasonable assistance to requests for clarification and replication.”

{REQUIRED} Please provide a codebook for the data. – The codebook should at a minimum describe the variables obtained from the data source, in a manner that will let others verify that they have obtained a substantially similar dataset if successfully obtaining access to the data.

5.1 Data Sources

file/name	public	private	shared with us	DOI/URL	Access described	cited readme	cited paper
BTS-Postes / DADS Postes 1995-2008	no	no	no	yes	yes / CASD procedure	no	yes
BTS-Entreprises / DADS Entreprises	no	no	no	yes	yes / CASD procedure	no	yes
FICUS / SUSE 1996-2007	no	no	no	yes	yes / CASD procedure	no	yes
FARE / ESANE 2010-2016	no	no	no	yes	yes / CASD procedure	no	no
Déclarations 2483 2002-2007	no	no	no	yes	yes / CASD procedure	no	yes
Allègement des cotisations sociales	no	no	no	yes	yes / CASD procedure	no	yes
BIC-RN	no	no	no	yes	yes / CASD procedure	no	yes
Baker, Bloom and Davis (2016)	yes	no	yes	yes	-	yes	no
Bozio and Wasmer (2024)	yes	no	yes	yes	-	yes	yes

5.1.1 Public Data

The CASD ReadMe mentions input data sources that are public data and not part of the CASD but they are not detailed in the ReadMe.

- ☒ Dataset is provided in public deposit
- ☐ Dataset is PRIVATELY provided (not for publication)
- ☐ DOI or URL is provided, and works: <http://data.bls.gov/cgi-bin/surveymost?sm+08>
- ☐ Access conditions are described:
 - ☐ No information on access conditions.
- ☐ Data are not cited, but a working paper, article, or other document is cited (not a data citation)
- ☐ Data are cited

- ☐ in the manuscript
- ☐ in the README:

5.1.2 Allègement des cotisations sociales

Data citation in paper mentions INSEE as author, the ReadMe says DARES.

5.1.3 FARE-ESANE

Data citation not found in neither the manuscript nor the ReadMe.

5.1.4 Baker, Bloom and Davis (2016)

Not cited in the manuscript.

6 Requirements

{REPLICATOR}: Check that these requirements are met.

- ☒ README is in TXT, MD, or PDF format
- ☐ README is accessible at the root of the package (not inside a folder)
- ☐ Title conforms to guidance (starts with "Data and Code for: Title of Paper" or "Code for: Title of Paper", is properly capitalized)
- ☐ Authors (with affiliations) are listed in the same order as on the paper

{REQUIRED} Please ensure that a ASCII (txt), Markdown (md), or PDF version of the README are available in the data and code deposit.

{REQUIRED} Please review the title of the deposit as per our guidelines.

{REQUIRED} Please review authors and affiliations on the deposit. In general, they are the same, and in the same order, as for the manuscript; however, authors can deviate from that order.

No affiliation for Nicholas Lawson in CASD_ReadMe mentioned.

6.1 Stated Requirements

- ☐ No requirements specified
- ☒ Software Requirements specified as follows:
 - SAS version 9.04.01M7P08052020, for WINDOWS (X64_SRV19), 4CPU
 - STATA 17, for Windows (PC 64-bit x86-64), MP 4 processors, born date: 18 Jul 2023
 - esttab / estpost / estout versions 2.1.1 / 1.2.2 / 3.31
 - tabout version 2.0.8
 - reghdfe version 6.12.3
 - ivreghdfe version 1.1.3
 - ivreg2 version 4.1.11
 - ranktest version 2.0.04
 - ftools version 2.49.1
 - Matlab (last run with Matlab release R2024b)
 - R (code was last run with R version 4.6.1)
 - Global Optimization Toolbox (for Matlab)
- ☒ Computational Requirements specified as follows:
 - under 25MBytes needed.
- ☒ Time Requirements specified as follows:
 - Length of necessary computation: ca. 3h (CASD)
 - 36h (R and Matlab part)
- ☐ Requirements are complete.

7 Analyzing Data and Code Files

7.1 Potential Personal Identifiable Information (PII)

⚠ We found the following instances of potentially personally identifying information. This may be completely legitimate but might be worth checking. As a reminder, privacy legislation in many countries (e.g. GDPR in EU) prohibits the dissemination of personal identifiable information without prior (and documented) consent of individuals. If indeed you want to publish such information with your replication package, you should probably have obtained IRB approval for this - please check!

Summary: - Data files with PII indicators: 3 - Variables flagged in data: 3 - Code files with PII references: 183 - PII references in code: 1932

7.1.1 Summary of Flagged Files

File Type	File	Variables/References	PII Categories
Data	CUMUL.csv	1	lat
Data	Donn_es.csv	1	lat
Data	econ-gen-taux-inflation.xlsx	1	lat

7.1.2 File Paths Report

Generated on 2026-09-14T17:04:50.429

Warning: Our search on file path types is imperfect and incurs both type 1 and type 2 errors. We aim to strike a reasonable balance between both. The below table is therefore only indicative. Detailed listings can be found in the appendix to this report.

In this table we analyse all files which contain source code (not data and documentation), and we report the grand total of each type of filepath we encountered.

Please check and replace any **windows** filepaths with unix compliant paths, insofar as this is possible in your setup. (Notice that **STATA** allows **/** to be a filepath separator on a windows platform, hence this is a requirement for *all* **STATA** applications.)

Files Analyzed	Windows Paths	Unix Paths	Mixed Paths	Drive Letters (C:\ etc)
560	28	159	28	12

7.1.3 Duplicate Files Report

We found the following duplicate files:

Filename	Size (MB)	Checksum (MD5)
/Replication Files/MatlabR/Unproductive Managers Specification/Code/MWResults/ZSolve.m	0.0	4f61c565dc9c4fe8650f9ae85ce3fa69254ac8

7.1.4 Zero Size Files Report

We did not find any zero sized files.

7.1.5 Large Files Report

We did not find any files larger than 100MB.

7.2 Code description

The replication package is split in 2 distinct parts:

The first part contains all the code to replicate the results based on non-public data the authors could not share with us, with a separate ReadMe document. This part contains 1) code/manual/ — author-tested execution path (27 sas-files and 6 do-files); code/Programs/ — SAS/Stata scientific programs needed by the retained manual path (4 SAS programs and 3 Stata); code/Tools/ — only the three helpers needed by the retained path: SAS environment check, Stata environment check, and CASD path resolver. This part contains also 2 files (1 for stata and 1 for sas) that call the stages of the replication in the right order.

The second part contains the code that may replicate results based on simulations and publicly available data. This part contains 4 matlab folders for the simulation exercise and 2 R folders that will create figures and tables. No master script was found in this folder.

The CASD part of the replication does not detail line numbers where results are replicated. No in-text numbers were reported in the ReadMe's. It would be great if the authors could include a table indicating which results of the article are reproduced by what part of the replication package the public one or the non-public one.

SUM:	214	1465	6843	35334

☐ The replication package contains a “main” or “master” file(s) which calls all other auxiliary programs.

{SUGGESTED} We strongly advise the use of a single (or a small number of) main control file(s) to automatically reproduce all figures and tables in the paper, without manual interaction.

NOTE: In-text numbers that reference numbers in tables do not need to be listed. Only in-text numbers that correspond to no table or figure need to be listed.

7.3 Computing Environment of the Replicator

- Nuvolos, 4CU.
- R 4.5.2 with quarto
- Matlab R2024b

8 Replication

- Downloaded code and data from dropbox.
- Committed code to git repo.
- I did not try to run the codes of the CASD folder as I do not have CASD access, I concentrated on the MatlabR folder. I changed all the main file paths in the 10 main.m scripts to fit to the nuvolos environment.
- To test how long one iteration of the simulation would take I ran the baseline specification first by itself which completed in ca. 54h.

9 Findings

9.1 Data Preparation Code

- Figure6.csv, Figure7.csv, Figure8.csv, FigureF1.csv, FigureF2.csv, FigureF2_96.csv, FigureF2_64.csv were reproduced.

9.2 Tables and Figures

- Figure 3A: the reproduced figure looks slightly different from the figure in the manuscripts:

- Figure 3B: the reproduced figure looks slightly different from the figure in the manuscripts:

- Figure 4A: the reproduced figure looks slightly different from the figure in the manuscripts:

- Figure 4B: the reproduced figure looks slightly different from the manuscript:

- Figure 4C: the reproduced figure looks slightly different from the manuscript:

- Figure 4D: the reproduced figure looks slightly different from the manuscript:

- Figure 5A: the reproduced figure looks slightly different from the manuscript:

- Figure 5B: the reproduced figure looks slightly different from the manuscript:

- Figure F1 fully reproduced.
- Table F1 values are slightly different.

Production cutoff, $\bar{\alpha}$	52.03	52.03	51.95	51.52	52.04	62.60

represents simulations of alternative scenarios where the minimum wage is either removed (Column (2)),

9.3 In-Text Numbers

• I did not identify any in-text numbers.

9.4 Other Issues

• n.a.

10 Classification

- ☐ full reproduction
- ☐ full reproduction with minor issues
- ☒ partial reproduction (see above)
- ☐ not able to reproduce most or all of the results (reasons see above)

10.1 Reason for incomplete reproducibility

☐ None.

- ☒ **Discrepancy in output** (either figures or numbers in tables or text differ)
- ☐ **Bugs in code** that were fixable by the replicator (but should be fixed in the final deposit)
- ☐ **Code missing**, in particular if it prevented the replicator from completing the reproducibility check
 - ☐ **Data preparation code missing** should be checked if the code missing seems to be data preparation code
- ☐ **Code not functional** is more severe than a simple bug: it prevented the replicator from completing the reproducibility check
- ☐ **Software not available to replicator** may happen for a variety of reasons, but in particular (a) when the software is commercial, and the replicator does not have access to a licensed copy, or (b) the software is open-source, but a specific version required to conduct the reproducibility check is not available.
- ☒ **Insufficient time available to replicator** is applicable when (a) running the code would take weeks or more (b) running the code might take less time if sufficient compute resources were to be brought to bear, but no such resources can be accessed in a timely fashion (c) the replication package is very complex, and following all (manual and scripted) steps would take too long.
- ☐ **Data missing** is marked when data *should* be available, but was erroneously not provided, or is not accessible via the procedures described in the replication package
- ☒ **Data not available** is marked when data requires additional access steps, for instance purchase or application procedure.
- ☐ **Missing README** is marked if there is no README to guide the replicator, or the README is not in compliance with JPE requirements

10.2 Potential Personal Identifiable Information (PII)

△ We found the following instances of potentially personally identifying information. This may be completely legitimate but might be worth checking. As a reminder, privacy legislation in many countries (e.g. GDPR in EU) prohibits the dissemination of personal identifiable information without prior (and documented) consent of individuals. If indeed you want to publish such information with your replication package, you should probably have obtained IRB approval for this – please check!

Summary: - Data files with PII indicators: 3 - Variables flagged in data: 3 - Code files with PII references: 183 - PII references in code: 1932
